

Customer

A Reputed Medical Healthcare Company,
Gurgaon, India

Key Benefits

- Timelines for approval process became shorter
- Response time to queries became quicker

Robust document capture and management solution platform brings efficiency and effectiveness to Medical Healthcare

Healthcare organizations today are adopting inventive and pioneering technologies to store and maintain electronic health records. However, healthcare providers continue to face numerous challenges when it comes to access to long-term patient histories or any other records. Also the patients and other providers often continue to contribute health information in various forms – either in the way of paper documents or by fax. The same holds true for employees. The answer to this lies in effectively converting the documents and integrating them into electronic record systems. In order to attain high levels of service standards and expectations, healthcare providers are nowadays ensuring that they are effectively converting, managing and securely exchanging structured and unstructured patient information in a reliable and trustworthy manner. All these initiatives have led healthcare providers to aptly deliver patient care in a time bound manner while increasing efficiency.

Robust document capture and management solution platform brings efficiency and effectiveness to Medical Healthcare

The client

A Reputed Medical Healthcare Company, Gurgaon, India

The challenge

This Reputed Medical Healthcare Company, is a multi-specialty institute located in Gurgaon. The multi-specialty institute, established in 2009, has been servicing patients for the last six years. It houses 2500 employees and has a capacity of 1250 beds with over 350 critical care beds, 45 operation theaters catering to over 20 specialties making it a truly world-class healthcare provider.

This healthcare company being a start-up, was pitched against seasoned players in the medical field. The organization wanted quality and low TAT (turnaround time) to be their USP. However, to maintain the records for its employees and patients, company followed a traditional route and its reliance on paper was quite significant. The process not only delayed the exit process of employees but any requests coming from patients for additional or duplicate copy of diagnostic reports were declined. The complex nature of documentation for both HR and medical department was posing a significant challenge. More often than not, the errors were caused by documentation gaps.

The company shifted its focus to digitizing the processes, however,

the solutions they used, gave them poor quality of imaging and high maintenance cost. This turned out to be a time consuming affair as opposed to being time effective. The ineffective information management system also caused a severe drop in productivity thereby, decreasing customer satisfaction. Therefore introducing a consistent document management and capture solution was the need of the hour. Making use of such solutions and products was imperative to keep up with the increasing volume of employee and customer data.

The solution

With limited time on hand, good research and a strong recommendation, this company upgraded its information management system to **Kodak i2400 Scanners**. By using **Kodak i2400 Scanners**, it was able to scan photographs on the forms and get quality images. Adopting to the new solutions enabled the company to reduce on operation costs by a huge margin as **Kodak i2400 Scanners** were low maintenance and technologically superior. In addition, through **Kodak Alaris'** sophisticated solutions the company was able to efficiently automate their processes along with providing seamless service at a competitive rate and speed. Timelines for approval process became shorter and response time to queries became quicker.
