We Turn Data Chaos into Business Opportunity

The ever-increasing flood of data, and how we manage it, is one of the greatest opportunities facing organizations in the 21st century. Kodak Alaris helps clients transform data into a powerful competitive advantage.

Our Unique Value
Science + Technology + Partnership

Kodak Alaris Information Management combines the science, technology and partnerships required for companies large and small to use data to drive business efficiency, growth and profitability.

Digital transformation is possible at any scale. Kodak Alaris scanners, software, support and services deliver end-to-end capture solutions to solve business challenges.
SCANNERS
Our award-winning products help businesses easily capture information in centralized high-volume centers and across multiple locations with on-site devices.

Harness the Power of Data Chaos

Kodak Alaris helps companies start or continue their digital transformation by turning data chaos into competitive advantage with solutions to common challenges.

**Mailroom Automation**
Mailrooms can be complex and chaotic, leading to loss of productivity and efficiency. This decreases your ability to deliver a customer experience with reliable results.

Learn about this challenge

**Records Management**
Throughout the document lifecycle, data needs to meet compliance requirements and corporate retention policies. All while avoiding human error from manual processes.

Learn about this challenge

**Forms Processing**
Processing paper-based forms is slow and error prone. Hand-keying data into digital systems slows the speed of your business and can carry high labor costs.

Learn about this challenge

**Accounts Payable Automation**
A paper-based accounts payable process can bring your business agility to a halt. Time is wasted matching invoices with purchase orders, manually routing forms and chasing approvals.

Learn about this challenge

**Customer Onboarding**
The first impression a new customer has starts with onboarding. Manual processes create longer sign-up times. Leading to lower customer satisfaction.
