

# Transforming BPO Operations with KODAK Info Input Solution

The differences between the previous system and **Kodak** Info Input Solution have been dramatic. Tronitech can now serve more customers in less time, putting them on an accelerated growth path without adding hardware or staff. They have achieved many key business results, including:

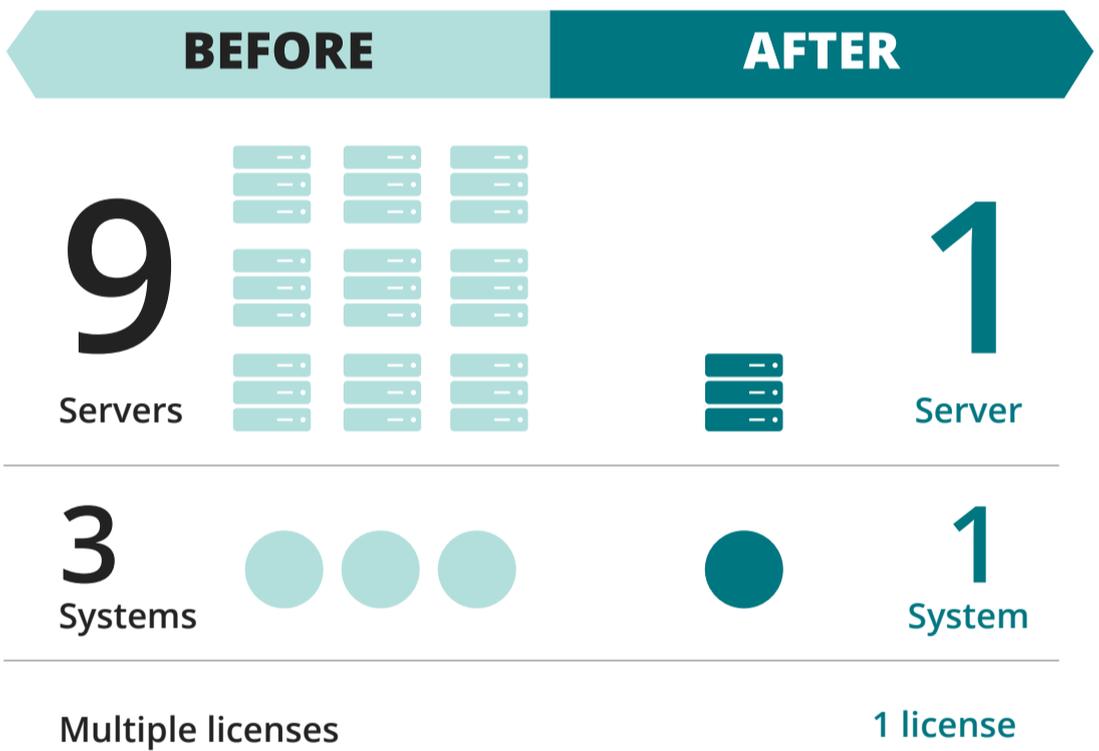

**6x**  
Faster job configuration

**2x**  
Processing volume

The time required to set up individual jobs was **reduced from 2 hours to a mere 20 minutes**. If you extrapolate this to the entire Tronitech customer base, the productivity gains are profound.

Tronitech can now handle **twice the processing volume on a single server**, compared to the previous nine-server setup.

## RESULTING IN...

Lower operational & maintenance costs

Reduced infrastructure & licensing

System flexibility & security

## ADDED VALUE

Without any additional cost or fees, Tronitech was able to boost their bottom line with many of Info Input Solution's built-in capabilities. From the ability to process various types of email attachments to Power BI reporting, Tronitech has added immense value for their customers and has future-proofed their document processing capabilities.

Email & attachment processing

Future-proofing with advanced AI

Automatic reporting
