

## Kodak Alaris REACH Article 33 Declaration

Under Article 33 of EU REACH Regulation (1907/2006), Kodak Alaris has a duty to communicate to our customers the presence of Substances of Very High Concern (SVHCs) in excess of 0.1% by weight of articles contained in our products (as defined by Court of Justice of the European Union Case C-106/14). Further, where necessary, sufficient information must be communicated to recipients to ensure safe use.

Kodak Alaris reviews our products for the presence of SVHCs as listed on the latest revision of the EU SVHC Candidate List. This review is based on engineering evaluation, testing, and supplier declarations and is correct to the best of Kodak Alaris' knowledge at the time of writing.

The articles named in the table below contain or may contain SVHCs in excess of 0.1% w/w as listed on the latest revision of the EU SVHC Candidate List.

Although SVHCs may be present in the articles listed below, at or above the 0.1% w/w level, in all cases they are considered safe for use as the SVHCs are incorporated into these articles in such a way that exposure or release is not expected provided these articles are used as intended, not deliberately damaged and are treated responsibly when no longer required. Therefore, additional information regarding safe use of the articles named below is not necessary.

Kodak Alaris products containing SVHCs at or above the 0.1% w/w level

<b>Product</b>	<b>SVHC Substance</b>	<b>SVHC CAS</b>
Kodak Rapid-Dry Poster Paper / Luster	Boric Acid	10043-35-3 11113-50-1
Kodak Rapid-dry Poster Paper / Metallic	Boric Acid	10043-35-3 11113-50-1
