

ENVIRONMENTAL PERFORMANCE DATA

For Kodak Alaris Imaging Equipment (Shanghai) Co., Ltd.*

ENVIRONMENTAL ASPECT	UNIT OF MEASURE	REPORTING YEAR		
		2016	2017	2018
GHG emissions (Scope 1 & 2)	metric tons CO ₂ e	717	616	576
Total water withdrawal	m ³	7317	4104	4013
Water Source(s)		public water supply	public water supply	public water supply
Percent and Volume of water recycled or reused		0	0	0
Total water discharged	m ³	6585	3693	3612
Receiving Body		Industrial Treatment	Industrial Treatment	Industrial Treatment
Total solid waste generated	metric tons	182.6	181.7	180.3
Wastes reduced, reused or recycled	metric tons	182.1	180.0	180.0
Solid waste landfilled	metric tons	0	0	0
Waste sent for energy recovery	metric tons	0	0	0
Waste sent to other disposal facilities	metric tons	0.5	1.7	0.3
Toxic materials released to land, water, or air that exceed thresholds according to US EPA Toxics Release Inventory (TRI)		0	0	0

* Prior to July 1, 2014 divestiture: Kodak Electronic Products Company, Ltd., Shanghai, China

ENVIRONMENTAL PERFORMANCE

Goals & Targets for Kodak Alaris Imaging Equipment (Shanghai) Co., Ltd.

Kodak Alaris scanners are manufactured at our imaging equipment factory in Shanghai, China. The site operations include equipment assembly, quality assurance and testing. The site's Greenhouse Gas (GHG) emissions are associated exclusively with the consumption of electricity (scope 2 emissions). The site does not have any chemical-intensive or water-intensive operations, so the greatest opportunities to reduce potential environmental impacts are typically focused on reducing electricity consumption and minimizing solid waste. Except for toxic material emissions (which are consistently zero), electricity use, water use and waste are influenced by variability in production volumes and product mix. Annual goals are established for environmental aspects as part of our Environmental Management System, which is third-party certified to ISO 14001:2015.

2017

Environmental Aspect	Objective	2017 Target	2017 Result
GHG Emissions (Scope 1 & 2) metric tons CO ₂ e	Reduce Electricity Consumption 5%	681 metric tons CO ₂ e	616 metric tons CO ₂ e
Water Use (m ³)	Reduce consumption to 2015 levels	5000 m ³	4104 m ³
Solid Waste (%)	Reduce/Reuse/Recycle solid waste generated	99% (<1% waste requires off-site disposal)	99.1%
Toxic Releases	Maintain zero releases	0	0

¹During 2016, the factory footprint changed – increasing the challenge to meet electricity and water targets.

2018

Environmental Aspect	Objective	2018 Target	2018 Result
GHG Emissions (Scope 1 & 2) metric tons CO ₂ e	Reduce Electricity Consumption 5%	585 metric tons CO ₂ e	576 metric tons CO ₂ e
Water Use (m ³)	Reduce consumption to 2015 levels	5000 m ³	4013 m ³
Solid Waste (%)	Reduce/Reuse/Recycle solid waste generated	99% (<1% waste requires off-site disposal)	99.8%
Toxic Releases	Maintain zero releases	0	0

2019

Environmental Aspect	Objective	2019 Target
GHG Emissions (Scope 1 & 2) metric tons CO ₂ e	Reduce Electricity Consumption 5%	585 metric tons CO ₂ e
Water Use (m ³)	Reduce consumption 20% from 2015 levels	4000 m ³
Solid Waste (%)	Reduce/Reuse/Recycle solid waste generated	99% (<1% waste requires off-site disposal)
Toxic Releases	Maintain zero releases	0
