

KODAK Capture Pro Software
Network Edition

Versatile & Accurate Capture Solutions

Service bureaus, BPOs, and enterprise organizations require the ability to manage and monitor their document capture processes securely. Capture Pro Network Edition streamlines the complexities of these processes through a centralized management platform, enabling the most efficient and secure operations.

Adapting to Change

With Capture Pro Network edition, information managers can easily pool and deploy client licenses to new users or temporary operators within their enterprise.

Centralized Configurations

Easily manage and share job specific scanning profiles between users, allowing operators to utilize the most common and efficient settings throughout the organization.

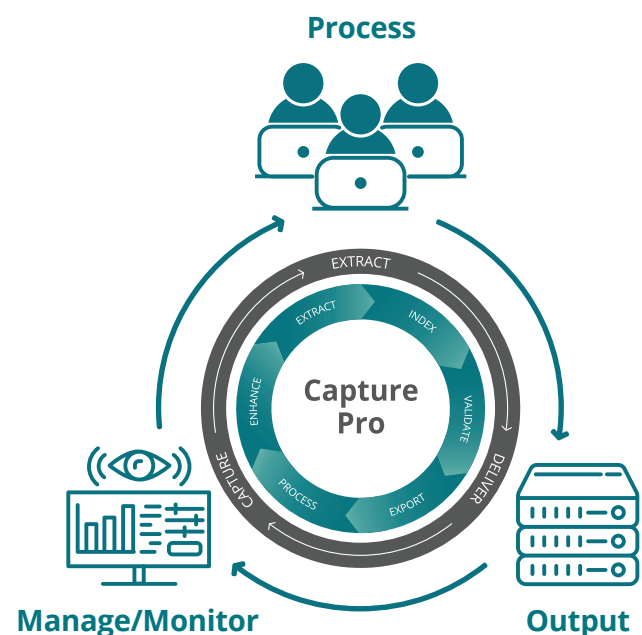

Live System Monitoring

Intuitive dashboards provide real time information on all batches being processed to prevent and resolve any potential bottlenecks within the organization.

Secure Document Output

Capture Pro Network edition provides centralized collection of all scanned batches through a secured output server that requires authentication before they are released.

Professional Services Available

The Kodak Alaris Professional Services team is highly experienced in evaluating your individual capture processes and information workflows to implement the most effective and efficient solution possible.
